# SDG. 5 (Gender Equality)

## Metrics and indicators

Underlined blue text directs to supporting evidence

### 5.6 Women’s progress measures

#### 5.6.7 Track women’s graduation rate

We conducted a **preliminary analysis** of graduation rates for the consecutive academic years covering the graduating classes of 2021-2022 and 2020-2021. We calculated the percentage of first-year undergraduate students who completed their programs within the specified timeframe in three distinct academic fields: Medicine, STEM, and Arts & Humanities/Social Sciences. The analysis highlighted disparities in graduation rates between genders, with a higher proportion of female students successfully earning their degrees. This underscores the need to implement strategies dedicated to supporting male students and closing the gender gap by assessing their academic performance, providing support services, and addressing any potential challenges that students may face.
