

College of Pharmaceutical
Sciences and Drug Manufacturing
A college accredited by "NAQAAE"

PT 010

COURSE DESCRIPTION:-

The course introduces the students to the formulation principles and applications of novel and targeted drug delivery systems by transforming proteins, genes, and other biotechnology driven compounds into therapeutic products. In addition to formulation aspects of biotechnology derived pharmaceuticals, it also covers the application of polymers and excipients to solve problems/issues concerning the optimization of absorption, selective transport and targeting.
