

PGC 906

Upon successful completion of this course, the students should be able to know guidelines for prescribing herbal drugs based on the pharmacological properties of these drugs including therapeutic uses, mechanism of action, dosage, adverse reaction, contraindications, and drug interaction. It allows the students to understand pharmacotherapeutic principles applied to the treatment of different diseases, pharmacovigilance, and rational use of drugs. Also, the students should understand the basis of complementary and alternative medicine with an emphasis on herbal remedies, nutrition supplements, homeopathies, and aromatherapy.
