

College of Pharmaceutical
Sciences and Drug Manufacturing
A college accredited by "NAQAAE"

PP 004

COURSE DESCRIPTION:-

The course is designed to enable the student to understand how various disease states alter the pharmacokinetic parameters of drugs also are the pharmacokinetic criteria altered in the paediatric and geriatric age groups. Concepts of drug monitoring for drugs with narrow therapeutic index are dealt with. The course will provide the student with the principles of dosing patients more rationally and safely in addition to pharmacogenomics approaches.
